

Dr. Bryan Friedmann
OPTOMETRIST

COVID-19 SAFETY PROTOCOLS

Your health and safety, ours, and that of the community is our TOP PRIORITY.

These protocols have been carefully developed with this in mind and in accordance with guidelines issued by BC's Provincial Health Officer, the Ministry of Health, the BC Centre for Disease Control & WorkSafeBC. Please go to www.drfriedmann.ca to review our complete COVID-19 SAFETY PLAN.

Come Alone

We have a 5 person limit in the office at any given time, so we ask that you come alone and about 10 minutes prior to your scheduled appointment time. One person may accompany a patient requiring support (e.g. parents, mobility aide, or translator).

Initial

Come in Good Health

To protect all of us we ask that you contact our office to reschedule your appointment if you have any cold, flu, or COVID-19 symptoms.

Initial

Hand Washing

Please use the Health Canada approved hand sanitizer when you enter the clinic and as needed thereafter, especially after you touch your face. We also have a sink in each exam room if you prefer to wash with soap and water instead.

Initial

Wear a Mask

Since we are unable to maintain the required 2 meter physical distance during your in-office eye exam, we wear masks to help protect you. We also ask that you kindly wear a mask to help protect us. Please bring your own if you have one, otherwise we will gladly provide one for you.

Initial

Please Don't Bring...

Food, drinks, and other non-essential personal items. Please also make sure your cell phone ringer is turned off for the duration of your time in our office.

Initial

Check-In

Staff may be in pretest with another patient or sanitizing an exam room when you are done your exam. For this reason, payment will be processed when you arrive so you can leave the office promptly afterwards.

Initial

I, _____, have read Dr. Bryan Friedmann's COVID-19 SAFETY PROTOCOLS and I agree to comply with them.
